Subject Index—Volume 25
(Page numbers starting with the letter S refer to the September supplement)

A

abdomen, sonographic duplication artifact in upper region, 658
academic radiology
  developments in U.S., 324, 332
  factors affecting career choice in, 675
  and health care priorities, 744
  and research directions in diagnostic imaging, 101
  research and research training in, 587
  and standards of behavior, 285
  and suggested improvement in speaking and writing, 203
  turf conflict and antitrust laws in, 200
accuracy in diagnosis
  clinical history affecting, 670
  in lymphography of lymphomas, 412
  and truth of diagnosis protocol, 568
acoustic prism effect, and duplication artifact in upper abdomen, 658
albumin, human serum, in MRI, S32
albunex in ultrasonography, S162
AM125 in MRI, 771
  uptake by liver, S61
American Association of Academic Chief Residents of Radiology (A^3CR^2), cases from 79, 82, 209, 295, 299, 754, 862, 865, 1054, 1058, 1159
angiography
  carotid, and twitching reactions from nonionic contrast media, 1004
  and contrast media affecting aortic and pulmonary arterial pressure, 437
  coronary
    citrate added to nonionic agents in, S144
    digital subtraction in, 908
    and effects of contrast media in heart failure, 41
    and effects of nonionic agents with sodium additions, S137
    and electrophysiologic effects of ioxaglate and iopamidol, S141
    and sodium with iopromide affecting ECG, S146
  digital subtraction
    automated tracking in, 1069
    coronary, 908
  effects of contrast media on venous endothelium, 121
  and histamine release from blood affected by contrast media, 1228
  and interactions of contrast media with platelets, S123
  and interactions of contrast media with red cells, S117, S119, S121
  magnification in vivo, 352
  renal, hemodynamic effects of, 365, 453
angioplasty, and comparison of probes heated with lasers and radiofrequency, 686
angiotensin converting enzyme inhibition by contrast media, 698
animal studies
  angiographic contrast media affecting venous endothelium, 121
  cell lysis affecting relaxation rates of blood and clot at various methenoglobin concentrations, 1232
  clearance of Gd-DTPA in renal insufficiency, 1212
  dual-energy coronary angiography, 908
  endothelium-dependent relaxation of corpora cavernosa, 1168
  extravasation injury from subcutaneous injection of contrast media, 678
  fast CT coronary stenosis detection, 472
  gadolinium-DTPA in liposomes, 638
  intra-articular Gd-DTPA affecting synovial membrane and cartilage, 179
  iodipimide ethyl ester particles in ultrasonography of liver, 1135
  laser lithotripsy of gallstones, 627
  left ventricular hypertrophy in aortic stenosis studies with MRI, 783
  lipid-coated microbubbles in neurosonography, 1300
  manganese hematoporphyrin as MRI contrast agent, 765
  metastatic calcification in bone, 1188
  microvascular changes after shock wave treatment, 664
  monitoring of melanoma response to chemotherapy, 1076
  MTBE infusions for gallstone dissolution
    tissue responses to, 58
    transcutaneous ultrasound with, 146
  myocardial function affected by contrast media, 41
  myocardial metabolism affected by contrast media, 127
  nonoperative portacaval shunt, 574
  percutaneous approach to inferior vena cava clip, 871
  percutaneous injection of ethanolamine oleate for hypersplenism, 651
  pharmacokinetics of iron oxide particles in MRI, 793
  platelet activation after endothelial injury, 988
  protocol review in, 271
  pulmonary oxygen toxicity, 373
  regional myocardial perfusion studies, 486
  renal medulla enhancement after perfluorooctylbromide administration, 1287
  thrombus growth affected by contrast media, 533
  twitching reactions affected by ion concentrations in contrast media, 1004
antimyosin, radiolabeled, for detection of myocardial infarction, 806
aortic stenosis with left ventricular hypertrophy, MRI in, 783
appendicitis, intrathoracic, in young girl, 1162
Armed Forces Institute of Pathology distinguished scientists, 625, 763
arteriovenous malformations, intracranial, 952
arthritis
  rheumatoid
    and detection of bone lesions in hand by digital radiography, 708
    Steinbrocker staging of, 536
  tuberculous, 295
Association of American Medical Colleges
  highlights from meeting of Council of Academic Societies, 967
  report to AUR and SCARD membership, 2
Association of University Radiologists
  abstracts of annual meeting, 1346
  Gold Medal Awards, 1339
  proceedings of annual meeting, 1337

B

biopsy, fine needle
  automatic sampler in, 245
  sampling technique affecting specimen size in, 1294
  suction affecting specimen size in, 1175
  transthoracic, 402
blood
  histamine release affected by contrast media, 1232
  magnetic resonance imaging of
    in vitro studies, 1316
    relaxation rate affected by cell lysis at various methemoglobin concentrations, 1232
  oxidation state of in vitro blood, 240
blood–brain barrier
  contrast media affecting, S82
  disruption studies with MR enhancement, S80
blood flow
  bronchial, evaluation of, 52
  renal, response to angiography, 365, 453

blood-pool imaging products, pharmacokinetics of, S109
blood pressure, pulmonary arterial and aortic, contrast media affecting, 437
bone
  anatomy of calcar femorale, 1311
  digital radiography for detection of lesions in hand, 708
  femoral neck patterns in osteopenia, 1116
  metastatic calcification in, 1188
  mineral data predicting femoral neck strength, 6
  Paget's disease with intracranial giant cell tumor, 1279
  trabecular bone affecting MRI of marrow, 173
book reviews
  Bag Balm and Duct Tape: Tales of a Vermont Doctor (Conger), 1165
  Clinical Radiology of the Small Intestine (Herlinger & Maglinte), 212
  Craniospinal Magnetic Resonance Imaging (Pomeranz), 759
  CT and Sonography of the Acute Abdomen (Jeffrey), 869
  Diagnostic Imaging of the Acute Abdomen (Beyer & Modder), 302
  Handbook of Breast Imaging (Peters, Voegeli, & Scanlan, Eds.), 963
  Imaging Techniques in Orthopaedics (Galasko & Isherwood), 1065
  Living with Radiation: The Risk and the Promise (Wagner & Ketchum), 868
Books received, 311
Bradykinin role in contrast media reactions, 698
brain
  ischemia of, magnetic resonance spectroscopy of, 1034
  morphometry studies with computerized system, 798
  relaxometry of tumors in, 1197
breast
  detection of clustered microcalcifications, 1102
  mammographic detection of cancer in young women, 67
  palpation findings compared to density at mammography, 1010
  role of reference radiologist in screening program, 971
  teleradiology transmitted mammograms, 111
bronchial circulation, evaluation of, 52

C

calcar femorale anatomy, 1311
calcification
  detection of clustered microcalcifications in mammography, 1102
  metastatic, in bone, 1188
carotid artery, effects of contrast media injections in, S90
  and twitching reactions from nonionic agents, 1004
cartilage, intra-articular Gd-DTPA affecting, 179
catheters
  ferromagnetic, in MRI, 1325
  Kensey recanalization, properties of, 631
cerebrospinal fluid
  electrolyte changes during myelography, S111
  oscillation measurements in spine, 72
chest films
  clinical history affecting interpretation of, 670
  image processing affecting interpretation of, 897
  impact of routine admission examination in emergency service, 720
  neonatal, and application of artificial neural networks, 1017
chest trauma, radiology of, 1265
choroid plexus papilloma, 862
citrate in nonionic contrast medium, inotropic effects of, S144
coagulation, contrast media affecting, 533
colon function in spinal cord injury, 109
complement activation in plasma, contrast media affecting, 789
compression of data
  and perimeter encoding for teleradiology, 811
  quadtree-based, in CT
    for abdominal images, 31
    for region of interest definition, 703
computed tomography
  cine CT
    for cardiac imaging, 838
    for quantitation of in vivo kidney volume, 1206
  of cystic pelvic mass with carcinoma of uterine cervix, 205
  dynamic spatial reconstructor for coronary stenosis detection, 472
  liposome carriers of contrast media in, for hepatosplenic imaging, S92, S95
  particulate contrast medium for liver studies, S98
  perfluorooctylbromide in
    biodistribution of, 915
    and renal medulla enhancement, 1287
  and pitfalls in diagnosis of metastases, 818
  and quadtree-based data compression
    for abdominal images, 31
    for region of interest definition, 703
  quantitative, postprocessing dual-energy methods in, 882
  in renal cell carcinoma, 261
  single photon emission in bronchial circulation studies, 52
  of spine, 19
  three-dimensional imaging of lung data in, 736
computer use
  application in teaching radiology, 947
  in brain morphometry studies, 798
  in digital subtraction angiography, 1069
  in hip strength analysis, 6
  in mammography of clustered microcalcifications, 1102
  in prosthetic heart valve kinetic function assessment, 24
  in radiology residency programs, 596
  in resident selection process, 1040
  in simulation of lung nodules, 902
  in topographic mapping of pharyngoesophageal segment, 184
contrast media. *See also specific contrast agents*
  adverse reactions to, S14, S29, 381
    morbidity and mortality in, S18
    and reduction of repeat reactions, S24
    risk factors for, S16
    in routine clinical practice, S20
  and aortic and pulmonary arterial pressure in rabbits, 437
  and blood-brain barrier damage in rabbits, S82
  cardiac effects of nonionic agents with sodium additions, S137
  carotid artery injections of, S90
    and twitching reactions from nonionic agents, 1004
  citrate added to nonionic agents, S144
  and complement activation in plasma, 789
  cytogenetic effects in urography, 692
  extravasation of, 504
    and injury from subcutaneous injection, 678
  and histamine release from blood, 1228
  inhibiting angiotensin converting enzyme, 698
  interaction with platelets, S123
  interaction with red cells, S117, S119, S121
  iodinated agents, S11, S149
    affecting extravascular lung water, 938
    affecting leukotriene B4 synthesis and metabolism, S25
    new low-osmolar agents, S104
    polymers as blood-pool imaging products, S109
  ion concentrations affecting twitching reactions, 1004
  liposome carriers for. *See Liposomes*
  liver damage from, S125
  in magnetic resonance imaging, S12, S34, S75
    enhancement mechanisms, S32
    indicator properties, S42
  muscular reactions to, S90
  and myocardial contractility in rats, 254

and myocardial function in dogs, 41
and myocardial metabolism in dogs, 127
neurotoxicity of, S90
from nonionic agents, S86
particulate agents in, S2. *See also* Particulate agents in radiography
polymers as blood-pool imaging products, S109
pretesting of, S22
renal damage from, S125, S127, S129
enzyme markers of, S133
hemodynamics in, 365, 453
after intravenous, cardiac, and lumbar aortic injections, S135
safety survey of, S7
stereoisomerism in, S102
and synaptosomal phospholipid metabolism in bats, S84
and thrombus growth in rabbits, 533
in ultrasonography, S12, S158, S167
and venous endothelium damage in rabbits, 121
vertebral artery injections of nonionic agents, S88
water-soluble
pulmonary effects of, 999
side effects in upper gastrointestinal tract, S27
coronary angiography. *See* Angiography, coronary
corpora cavernosa, endothelium-dependent relaxation of, 1168
costs
constraints in medicine, and technology transfer, 745
of radiology in DRG environment, 194
Council of Academic Societies, highlights from meetings of, 967
critical reviews
comparison of iopamidol and diatrizoate in excretory urography, 1255
localized magnetic resonance spectroscopy, 1047
teleradiology for family practice center, 98
Crohn's disease, diagnosis with ultrasound, 1085

D

diabetes mellitus, neurologic disorder in, 82
diagnostic-related groups (DRGs), and costs of radiology, 194
diagnostic radiology by non-radiologists, 190
diatrizoate
affecting extravascular lung water, 938
compared to iopamidol in excretory urography, 1255
and complement activation in plasma, 789
cytogenetic effects in urography, 692
inhibiting angiotensin converting enzyme, 698
and myocardial function in dogs, 41
pulmonary effects of, 999
safety survey of, S7
side effects in upper gastrointestinal tract, S27
vertebral artery injections of, S88
digital radiography
for bone lesion detection in hand, 708
and clinical history affecting interpretation of oc hest images, 670
computer-simulated lung nodules in, 902
nonradioactive xenon for pulmonary ventilation studies, 728
perimeter encoding in, 811
in screening for pleural disease, 645
dysprosium-DTPA in MRI, S32
in cerebral perfusion deficits, S37
in myocardial imaging, S74

E

editorials, 311, 312, 761, 1167
education for radiology
anatomy instruction with diagnostic images, 292
and appreciation of teachers, 961
and attitudes of medical students, 85
computer-assisted program in, 947
computer use in residency programs, 596
joint course in emergency radiology, 1261
junior rotation in, 1153
mini-fellowship in teaching, 751
predictors of resident performance, 855
selection of residents, 761, 860
computer facilitation of, 1040
and satisfaction of search in diagnostic radiology, 133
standardization of curriculum in, 1258
teaching effectiveness evaluated by residents, 287
and tuition fees during training, 1156
electrocautery, radiofrequency, in ablation of hepatic lesions, 267
emergency radiology, joint course in, 1261
emergency service, and impact of routine chest films, 720
endometrial polyp, giant, 1276
environmental issues in hazardous waste control and disposal, 942
errata, 4, 45, 621, 998
ethanolamine oleate in hypersplenism, 651
ethics, and protocol review for animal research, 271
exercise, and proton T2 of muscle, 480
extravasation of contrast media, 504
and tissue damage from subcutaneous injection, 678

F

femoral neck strength prediction from bone mineral data, 6
ferrite particles. *See* Iron oxide particles in MRI
ferromagnetic catheters in MRI, 1325
ferromagnetic seeds implanted for hyperthermia in cancer treatment, 824
fetal demise syndrome, 1159
fluorescence, X-ray induced, in regional myocardial perfusion studies, 486
fluorine-19 in MRI, S46
fractals, characteristics of, 1140
French health-care system, radiology in, 1246

G

gadolinium in MRI
Gd-BOPTA, S58, S59
Gd-DOTA, S53
intravenous, tolerance for, 933
liposomes labeled with, S65
physiologic effects of, 714
Gd-DTPA, S32
biodistribution of, 164
bisamide derivatives of, S56
in blood–brain barrier injury, S80
clearance in renal insufficiency, 1212
intra-articular, affecting synovial membrane and cartilage, 179
liposome-encapsulated, S63, S65, 638, 922
macromolecular agents with, S51
newly developed complexes of, S49
relationship to MR enhancement, S44
safety and tolerance of, S39
Gd-MCTA, S53
gallstones
and cholecystoduodenal fistula with impending ileus, 757
dissolution with MTBE
and tissue responses to infusions in rabbits, 59
transcutaneous ultrasound with, 146
laser lithotripsy in swine, 627
shock wave lithotripsy in
advantages and disadvantages of, 1149
and microvascular changes in rabbits, 664
gastrointestinal tract

cholecystoduodenal fistula and gallstone ileus, 757
invagination of duodenal diverticulum, 1061
iopamidol as contrast agent for, 141
motility in spinal cord injury, 109
plasmacytoma of stomach, 865
ultrasonography of inflammatory bowel disease, 1085

H

hamartoma, hepatic mesenchymal, 1058
hand bone lesions detected with digital radiography, 708
hazardous wastes, control and disposal of, 942
health care
priorities in, 744
and radiology in French system, 1246
heart
advances in imaging modalities, 838
assessment of prosthetic valve kinetic function, 24
contractility affected by contrast media, 254
coronary angiography. *See* Angiography, coronary
fast CT coronary stenosis detection, 472
infarction imaging with MRI, 806
ferric pyrophosphate in, 153
tissue characterization in, 1120
magnetic resonance imaging of
air-driven pump use in research, 579
in aortic stenosis with left ventricular hypertrophy, 783
contrast media in, S74
variability of myocardial signal in, 1024
metabolism affected by contrast media, 127
regional perfusion studies, 486
heart failure, and effects of contrast media in dogs, 41
hemangioendothelioma, hepatic, in infancy, 79
hematoporphyrin, manganese bound to, in MRI, 765
hip
calcar femorale anatomy, 1311
current status of joint replacement, 86
strength analysis with bone mineral data, 6
histamine release from blood affected by contrast media, 1228
histiocytoma, malignant fibrous, retroperitoneal, 754
Hodgkin's disease, lymphographic accuracy in, 412
hydrophilicity, and development of new iodinated contrast media, S104
hyperthermia in cancer treatment, 824

I

immunoscintigraphy in myocardial infarction, 806
interventional radiology, new technologies for, 93
intestines. *See* Gastrointestinal tract
Investigative Radiology
broadening of scope in, 320
founding and early years of, 313
selection of best articles from, 352
third sponsor of, 326
transitional years of, 318
twenty-five years of, 323, 347
iodamide
and complement activation in plasma, 789
safety survey of, 37
iodinated contrast media, S11, S149
affecting extravascular lung water, 938
affecting leukotriene B4 synthesis and metabolism, S25
new low-osmolar agents, S104
polymers as blood-pool imaging products, S109
iodipimide inhibiting angiotensin converting enzyme, 698
iodipimide ethyl ester particles in ultrasonography of liver, 1135
iodixanol, clinical experience with, S113
iohexol
affecting thrombus growth, 533
compared to ioxilan, 46
and complement activation in plasma, 789
inhibiting angiotensin converting enzyme, 698
intracarotid injections of, S90
intracisternal toxicity study of, S86
and myocardial function in dogs, 41
in renal function studies, 778
sodium addition affecting myocardial contractility, S137
urinary excretion after radiation injury of intestine, S115
iomeprol, Smiles arrangement of, S100
iopamidol
compared to diatrizoate in excretory urography, 1255
and complement activation in plasma, 789
electrophysiologic effects in coronary angiography, S141
as gastrointestinal contrast agent, 141
inhibiting angiotensin converting enzyme, 698
intracisternal toxicity study of, S86
pulmonary effects of, 999
safety survey of, S7
Smiles arrangement of, S100
iopentol, sodium addition affecting myocardial contractility, S137
iopromide
intracarotid injections of, S90
side effects in upper gastrointestinal tract, S27
sodium addition affecting ECG in coronary angiography, S146
vertebral artery injections of, S88
iothalamate
and complement activation in plasma, 789
inhibiting angiotensin converting enzyme, 698
safety survey of, S7
iotrolan
intracarotid injections of, S90
pulmonary effects of, 999
side effects in upper gastrointestinal tract, S27
vertebral artery injections of, S88
ioversol
intracisternal toxicity study of, S86
Smiles arrangement of, S100
stereoisomers of, S102
ioxaglate
affecting extravascular lung water, 938
affecting thrombus growth, 533
and complement activation in plasma, 789
cytogenetic effects in urography, 692
electrophysiologic effects in coronary angiography, S141
inhibiting angiotensin converting enzyme, 698
liposome carriers in CT for hepatosplenic imaging, S95
ioxilan
hemodynamic effects of, 46
inhibiting angiotensin converting enzyme, 698
safety and tolerance of, S107
iron oxide particles in MRI, S67, 771
pharmacokinetics of, 793
in starch microspheres, 113, 793
uptake of AM125 by liver, S61
ischemia
brain, magnetic resonance spectroscopy of, 1034
in spinal cord compression, 444

J

joints
current status of replacements for, 86
intra-articular Gd-DTPA affecting synovial membrane and cartilage, 179

K

Kensey catheter, properties of, 631
keranserin, vascular response to, 495
kidney
  blood flow response during angiography, 365, 453
  computed tomography in renal cell carcinoma, 261
  cortical echogenicity in infants, 250
  damage from contrast media, S125, S127, S129
    enzyme markers of, S133
    hemodynamics in, 365, 453
    after intravenous, cardiac, and lumbar aortic injections, S135
  function studies with iohexol, 778
  handling of Gd-DOTA, 714
  impaired function affecting clearance of Gd-DTPA, 1212
  ioxilan affecting, 46
  magnetic resonance imaging of, and maximizing contrast-to-noise ratio with implanted coils, 552
  microvascular changes after shock wave treatment, 664
  quantitation of in vivo volume, 1206
  radiodense medulla after perfluorooctylbromide administration, 1287
knee menisci, magnetic resonance imaging of, 1224

L

lasers
  erbium:YAG for vascular tissue ablation, 235
  free electron, and Compton backscatter X-rays, 465
  heated probes for angioplasty compared to radiofrequency energy, 686
  lithotripsy of gallstones in swine, 627
legal aspects of turf conflicts, 200
letters to the editor, 620, 1066
leukemia, acute nonlymphocytic, 1054
leukotriene B4 synthesis and metabolism affected by iodinated contrast media, S25
lipid-coated microbubbles in neurosonography, 1300
liposomes
  as carriers of contrast media in CT for hepatosplenic imaging, S92, S95
  as carriers for Gd-DTPA in MRI, S63, S65, 922
    biodistribution and clearance of, 638
  encapsulated manganese for MRI, 545, 922
  preparation with modified reverse-phase evaporation procedure, 1125, 1217
lithotripsy in gallstones
  lasers in, 627
  shock waves in
    advantages and disadvantages of, 1149
    and microvascular changes in rabbits, 664
liver
  ablation of lesions with radiofrequency electrocautery, 267
  computed tomography of
    with liposomes as carrier of contrast media, S92, S95
    particulate contrast media in, S98
  contrast media affecting, S125
  hemangioendothelioma of infancy, 79
  magnetic resonance imaging of
    contrast agents in, S56, S58, S59, 1130
    liposome encapsulated $MnCL_2$ in, 545
    uptake of AM125 in, S61
  mesenchymal hamartoma of, 1058
  ultrasonography of, particulate contrast agents in, S165
  ultrasound tissue characterization of, 1091
    and attenuation maps, 1095
lungs
  biology of metastatic disease, 215
  bronchographic morphology in, 392
  computer-simulated nodules, 902
  extravascular water affected by iodinated contrast media, 938
  nodule detection
    visual feedback affecting, 890
    visual skill affecting, 994
  oxygen toxicity in, 373
  radiology performance and consultation patterns, 1251
  three-dimensional imaging of, 813
    from CT data, 736
  transthoracic needle biopsies of, 402
  transplantation of, radiographic assessment of, 511
  vascularization of metastases in, 423
  ventilation studies with digital radiography and nonradioactive xenon, 728
  water-soluble contrast media affecting, 999
lymphographic accuracy in lymphomas, 412

M

magnetic resonance imaging
  advances in, 275
  air-driven heart pump use in research, 579
  of blood and clots, 1316
    and cell lysis affecting relaxation rates at various methemoglobin concentrations, 1232
    and temporal changes of in vitro blood, 240
  in cardiac imaging, S71, 838
    contrast media in, S74
    in left ventricular hypertrophy with aortic stenosis, 783
    signal variability in, 1024
  contrast media in, S12, S34, S75
    enhancement mechanisms, S32
    indicator properties, S42
  dyprosium-DTPA in, S32
    in cerebral perfusion deficits, S37
    in myocardial imaging, S74
  enhancement related to gadolinium concentration, S44
  ferromagnetic catheters in, 1325
  fluorine-19 in, S46
  gadolinium in. *See* Gadolinium in MRI
  iron-oxide particles in, S67, 771
    pharmacokinetics of, 793
    in starch microspheres, 113, 793
    uptake of AM125 by liver, S61
  of knee menisci, 1224
  liposomes as carriers in
    for Gd-DTPA, S63, S65, 638, 922
    for $MnCL_2$, 545
  liver-specific contrast agents in, S56, S58, S59
    in biliary obstruction, 1130
  manganese hematoporphyrin in, 765
  maximizing contrast-to-noise ratio with implanted coils, 552
  metalloporphyrins in, S69, S71
  in monitoring of tumor response to therapy, 1076
  in myocardial infarction, 806
    ferric pyrophosphate in, 153
    relaxation times and backscatter measurements in, 1120
  of nerve sheath tumors, 1238
  nonionic paramagnetic metal complexes in, S56
  and pitfalls in diagnosis of metastases, 818
  polyethylene-glycol-ferrioxamine in, S48
  polysaccharide polymers in, 164
  in preautopsy screening, 286
  and proton T2 of exercised muscle, 480
  relaxometry of brain tumors, 1197

surface coil FLASH imaging of pancreas, 977
trabecular bone affecting bone marrow images, 173
tumor-seeking agents in, S69, S71
voxel shifting in, 1305
magnetic resonance spectroscopy
of brain ischemia, 1034
contrast media in, S34
of implanted melanomas, 1076

workstations, radiology, 282

X

xenon, nonradioactive, with digital radiography in pulmonary ventilation studies, 728
xenon-133 in lipid emulsion for tissue perfusion studies, 724
x-ray fluorescence in regional myocardial perfusion studies, 486

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 2, 1970: Section 3685, Title 39 United States Code) Date of Filing—October 1, 1990. Title of Publication—INVESTIGATIVE RADIOLOGY; Frequency of Issue—Monthly; Annual Subscription Price—$110.00; Location of Known Office of Publication—Downsville Pike, Rt. 3, Box 20-B, Hagerstown, MD 21740; Location of Headquarters or General Business Offices of the Publisher—J.B. Lippincott Company, East Washington Square, Philadelphia, PA 19105; Publisher—J.B. Lippincott Company, East Washington Square, Philadelphia, PA 19105; Editor—Bruce J. Hillman, M.D., Department of Radiology, University of Arizona College of Medicine, Tucson, AZ 85724; Managing Editor—Lynda Krumpholz, East Washington Square, Philadelphia, PA 19105; Owner—J.B. Lippincott Company, East Washington Square, Philadelphia, PA 19105; Known Bondholders, Mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities—Wolters Kluwer, U.S. Corporation, 1185 Avenue of the Americas, 37th Floor, New York, NY 10036. A. Total no. copies printed (*net press run*), average 3,150, actual 3,100; B. Paid circulation 1. Sales through dealers and carriers, street vendors and counter sales, average none, actual none; 2. Mail subscriptions, average 2,396, actual 2,058; C. Total paid circulation, average 2,396, actual 2,058; D. Free distribution by mail, carrier or other means. Samples complimentary, and other free copies, average 206, actual 162; E. Total distribution (*sum of C and D*), average 2,602, actual 2,220; F. Copies not distributed 1. Office use, leftover, unaccounted, spoiled after printing, average 548, actual 880. Returns from news agents, none; G. Total (*sum of E & F—should equal net press run shown in A*), average 3,150, actual 3,100. I certify that the statements made by me above are correct and complete. J.W. Lippincott, *Vice President*.
